

# Prepolymer

## MGB-024

MGB-024 is an MDI quasi prepolymer extended with 1000 molecular weight PTMEG polyether designed to formulate high performance elastomers and room temperature cure elastomers in the harder Durometer ranges. This prepolymer can be used to formulate polyurethane raw materials with good abrasion resistance coupled with excellent hydrolytic stability.

### Typical Physical Properties

Specific Gravity at 72 °F:	1.136
Viscosity 72 °F, 110 °F (cps):	1200, 350
% NCO:	17.8
Amine Equivalents:	236
Appearance at 77 °F:	Pale Yellow Liquid

### Health and Safety Information

We have prepared Safety Data Sheets and Product Labels that provide health and safety information intended to aid in the safe use of this prepolymer. Before using or handling this product each person must read and become familiar with the available information on its hazards and proper use and handling procedures. For more information, contact your Northstar Polymers representative or call our corporate headquarters in Minneapolis MN.
